

## Nutrition for your skin and hair!

Our high performance fruit oils and exfoliants are produced from red and black raspberry, cranberry, strawberry, blueberry and pomegranate, and are perfect for using in high quality natural cosmetic and personal care products. Berry fruit oils contain high levels of both tocotrienols and tocopherols, the natural components of Vitamin E, as well as linoleic and alpha-linolenic acid, carotenoids and natural antioxidants. Tocotrienols and tocopherols have been clinically shown to reduce inflammatory damage caused by UV exposure, and are proven antioxidants capable of visibly reducing the signs of skin ageing. Fruit oils such as cranberry and raspberry are also effective in the prevention of gingivitis, rash, eczema, and other skin lesions, and their anti-inflammatory activity is superior compared to virgin avocado oil, grape seed oil, hazelnut oil, and wheat germ oil.

The phytochemicals in our berry seed flours/exfoliants are effective against pathogenic bacteria such as *Vibrio cholerae*, *Shigella dysenteriae*, *Campylobacter* spp., *Salmonella*, *Staphylococcus* and *Camphylobacter* and are ideal for use in oral care and acne preparations.

### Soaps and Exfoliants

Our berry seed exfoliants add vivid color and rich texture to soaps, body gels and scrubs, and come in a variety of mesh sizes, ranging from coarse, (ideal for foot scrubs) to fine (ideal for face and body). Our fruit oils have high saponification values and are suitable for the production of high quality face soaps.

### Sunscreen, Moisturizers, Aftershave cream, Lip balms, Face Masks

Include our fruit oils (i.e. raspberry and cranberry seed oil) as a natural broad spectrum UV-A (equivalent PFA ~7 and UV-B (SPF~28) protectant in topical skin preparations and take advantage of their excellent emollient and emulsification properties for inclusion in moisturizing crèmes, lip balms/lipsticks and shaving emulsions.

### Toothpaste

Add our cranberry, red or black raspberry seed oils and seed flours to toothpaste to promote oral health- the natural way. Anti-adhesion properties found in these berries and oils prevent bacteria from 'sticking' to the tooth's surface, while natural anti-microbial tannins inhibit the growth of bacteria that cause plaque and gingivitis.

### Shampoo & Conditioner

Fortify shampoos and conditioners with Essential Fatty Acid rich berry seed oils, with balanced Omega3:6 ratios, to strengthen and moisturize hair and nourish the scalp.

Our proprietary cold press oil extraction process does not use heat, chemicals or solvents, guaranteeing oils of the highest quality and purity. All of our products are free of artificial colors, flavors, preservatives, and are GMO and allergen free. Select ingredients also available in certified organic form.
